

Physiological CTG
& Fetal ECG
Master Class
Ghent

26th - 27th of October 2020

Neoventa Academy

Welcome to CTG Master Class!

The CTG Master Class will give you a deeper understanding of CTG and CTG interpretation and offers an incomparable opportunity for obstetricians and midwives to assess and interpret a wide range of real-life obstetric emergencies. Conducted by Edwin Chandraharan, the Director of Global Academy of Medical Education and Training Ltd.

The Physiological CTG & Fetal ECG Master Class is a Basic CTG Master Class focused on ST Analysis. The aim of the class is to get a greater understanding in fetal physiology and pathophysiology behind the patterns that are observed on the CTG Trace to determine fetal response to hypoxic and mechanical stresses that occur during labour together with the additional tool ST Analysis. "A second pair of eyes!"
